

FACT SHEET

- Auria is a leading global supplier of automotive thermal, acoustical and fiber-based products.
- Formed in 2017, Auria is built on a 100-year transportation industry heritage.
- With 7,000 employees at 27 manufacturing facilities and 11 commercial, engineering and testing and tooling facilities across the globe, Auria serves as a leader in the supply of flooring, acoustic and other fiber-based products.
- Auria offers uniquely engineered acoustical solutions, with equal attention to weight reduction, creating the comfortable, quiet environment drivers and passengers demand from the inside out.

ACOUSTICS

- Auria acoustic solutions block and absorb road and structural noise, and reduce engine noise in the interior.
- Auria acoustic products include dash insulators and absorbers, airway and densified fiber, vertical lapped fiber, mass back extrusion, foam in place and custom sheeting.
- Auria acoustical engineering utilizes the company's extensive NVH laboratories and expertise to tune each vehicle for optimal acoustic performance.

FLOORING

- Auria flooring systems are the major trim feature and the carrier for a significant portion of the interior acoustic system.
- Auria's flooring systems include carpeted floors, utility flooring, accessory mats, tufted and non-woven textiles, utility vacuum forming and compression molding.

FIBER-BASED PRODUCTS

- Auria fiber-based products provide comfort, style, safety and functionality for the interior of the vehicle, blending artisan craftsmanship with high-tech innovations and safety features.
- Auria fiber-based solutions include trunk trim, package trays, wheel liners, underbody shields, acoustic mapping and light weighting services.

AERODYNAMIC

- Auria aerodynamic products are on the cutting edge of automotive aerodynamic performance.
- Auria aerodynamic products, like underbody panels, create streamline air flow effect between the vehicle's undercarriage and the road resulting in reduced or eliminated low pressure zones and drag on the vehicle.
- Auria aerodynamic products create increased fuel economy, reduced wind and road noise.

AURIA KEY LOCATIONS

Global & European Regional HQ:
Coleshill
Highway Point, Gorsey Lane
Coleshill, Birmingham B46 1JU
United Kingdom

North American Regional Headquarters:
Southfield
26999 Central Park Blvd., Suite 300
Southfield, Mich., 48076
United States of America
